Essential oils

Allspice	Cocoa	Nutmeg
Amber (Styrax)	Cognac white	Neroli
Anise	Copaiba balsam	Niaouli
Agar musk	Coriander	Oak moss absolute
Amberette seed	Cypress	Orange (10 fold)
Arnica	Dill	Oregano
Bergamot	Elemi	Palmarosa
Bergamot mint	Eucalyptus	Patchouli dark
Basil	Fennel	Patchouli MD
Basil sweet	Frankincense	Patchouli
Bay laurel	Garlic	Peppermint
Black cumin	Geranium	Peppermint (Japanese)
Black pepper	Ginger root	Pennyroyal
Black spruce	Grapefruit, pink	Peru Balsam
Blood orange	Green pepper	Petigrain
Blue tansy	Helichrysm-Rambiazina	Pine needle
Carnation absolute	Heliotrope	Rose otto
Carnation	Jasmine	Rosewood
Carrot seed	Jasmine musk attar	Rue
Castoreum	Labdanum	Sandalwood
Cedar wood	Lavender	Spearmint
Cardamom	Lemon	Tarragon
Celery seed	Lemon Verbena	Tea tree
Chamomile - wild	Lime	Thyme
Chamomile	Liquid Amber	White Spruce
Cilantro	Magnolia flower	Wintergreen
Cinnamon Bark	Mandarin red	Worm wood
Citronella	Mimosa	Vanilla
Clary sage	Mugwort (armoise)	Vetiver
Clementine	Myrrh	Violet leaf
Clove bud	Myrtle	Ylang ylang

Natural Fragrances

Amber	Green Apple	Melonal
Amber-Cardamom	Gardenia	Melon
Amber-Patchouli	Grapefruit	Mossy
Apple	Green	Orange
Balsam-Cedar	Hibiscus-White Amber	Orange Blossom
Bayberry	Hyacinth	Ozone
Blackcurrant	Jasmine	Patchouli
Black Pepper	Jasmine-Rose	Peach
Blood Orange	kiwi	Pear
Blue Spruce	Iceberg	Pine
Blue Musk	Jasmine	Pina Colada
Carnation	Lavender	Pineapple
Cedar wood	Lavender-rose	Rain
Cherry	Lemon verbena	Raspberry
Classic spice	Light & Airy	Rose
Cucumber	Lilac	Strawberry
Fresh blender	Lime	Summer Sorbet
Fruit	Lotus	Sweet Pea
Ginger	Male woody	Watermelon
Grapefruit	Mango	Wood

Pheromones

Alpha Male concentrate - Androstenone

Bonding concentrate - Oxytocin

Female factor - Copulins

Male concentrate - Copulins

Truffle concentrate - Beta-Androstenol

Unisex concentrate - Alpha-Androstenol

Ultra-feminine concentrate - Estratetraenol

Resins

Boswellia Sacra Carteri

Dragons Blood

Frankincense (Boswellia Papyrifera)

Jawee

Cosmetic Actives (peptides)

Acetyl Hexapeptide-38 - Instantly tightens skin.

Acetyl tetrapeptide-2 - mimics the body's natural growth hormone which triggers the reparative processes, restores structural integrity of the upper eyelid, acts against sagging while reducing fine lines and wrinkles, reduce dark circles and puffiness due to poor circulation. restores firmness and volume.

Biotinyl tripeptide-1 - has a positive effects on hair follicles by promoting scalp micro-circulation and reducing follicle atrophy and aging, stops hair from falling out.

Hexapeptide-9 - has significant wrinkle reduction and skin repairing effects, promotes the synthesis of dermal collagen, promotes the regeneration of dermal-epidermal junction and skin cell differentiation.

Hexapeptide-16 - stimulates hair growth

Palmitoyl Pentapeptide-4 - stimulates collagen I, III and VI fibronectin, elastin, glucosamnoglycans, same as retinol with no side effects

Palmitoyl Tripeptide-5 - speeds up collagen synthesis in the skin.

Palmitoyl tetrapeptide-7 - reduces skin inflammation and accompanying skin damage, stimulate regeneration of collagen fibers in the dermis by acting as a cellular messenger.

Pentapeptide-17 - stimulates hair growth.

Aligenin - stimulates hair growth.

Cosmetic Actives (others)

Allantonin - heals, softens, soothes and protects skin, stimulates cell regeneration promoting healthy skin, stimulate the growth of new healthy tissue., helps reduce scaring.

Arbutin - strong whitening agent.

Azelaic acid - inhibits the growth of acne-causing bacteria, exfoliates, normalizes oil production, major anti-inflammatory.

Dipalmitoyl hydroxyproline - triple action skin firming, wrinkle corrector, Long-lasting moisturizer, antioxidant,

DMAE - tightens skin in a bout 20 minutes.

Hydroxyproline - important for collagen synthesis, inhibits the enzymes responsible for the degradation of collagen and elastin.

Kojic acid - skin whitener.

N-acetyl glucosamine - increases hyaluronic acid production in the skin, repairs and treats sun damage, reduces the appearance of wrinkles, accelerates wound healing, reduces trans-epidermal water loss, improves skin tone, improves barrier function, reduces hyperpigmentation, improves skin hydration.

Niacinamide - boosts skin immunity, improves epidermal barrier, improves redness and blotchiness, regulates oil flow, protects skin from infrared light, reduces hyper-pigmentation, helps minimize lines and wrinkles, lightens skin tone.

Oleanolic acid - helps prevent hair loss

Potassium 4-methoxysalicylate - strong skin whitener

Salicylic acid - exfoliates

Tannins - strong astringent , hair colorant

Vitamin C (ascorbic acid) - helps stimulate skin cell growth.

Vitamin E - healing, antioxidant.

Witch Hazel - astringent .

Zinc Pyrithione - inhibits bacteria and fungus cell division.

Colloidal Metals

Nanosilver (5 nm) - 40 ppm

Nanogold (5 nm) - 40 ppm

Nanozinc (5 nm) - 40 ppm

Nanomanganese (5 nm) - 40 ppm

Butters

Aloe Vera butter

Kokum

Almond

Lingonberry

Argan

Mango

Avacado

Moringa seed

Babassu

Mustard seed

Black cumin seed

Neem

Borage

Oat

Carrot seed

Olive

Chia seed

Raspberry

Coco butter

Red castor

Coffee seed

Rice bran

Cucumber seed

Rosehip seed

Flax seed

Sal

Grape seed

Sunflower

Green tea seed

Shea

Hemp seed

Squalene (from olive oil)

Jjoba

Sweet almond

Kukui nut

Wheat germ

Oils

Aloe Vera butter	Kokum
Almond	Lingonberry
Argan	Mango
Avacado	Moringa seed
Babassu	Mustard seed
Black cumin seed	Neem
Borage	Oat
Carrot seed	Olive
Chia seed	Raspberry
Coconut	Red castor
Coffee seed	Rice bran
Cucumber seed	Rosehip seed
Flax seed	Sal
Grape seed	Sunflower
Green tea seed	Shea
Hemp seed	Squalene (from olive oil)
Jojoba	Sweet almond
Kukui nut	Wheat germ

Waxes

Bees wax (white)
Bees wax (yellow)
Candelilla

Thickeners

Polyvinyl alcohol (plant source)
Guar Gum
Hydroxyethylcellulose
Sodium Alginate
Sodium carboxymethylcellulose
Xanthan Gum

Clays & Misc.

Activated charcoal powder

Australian Beige

Australian Green

Bentonite

Dead sea mud

Fullers Earth

French Green

French white Kaolin

French yellow

Iceland moss

Multani Mitti

Red algea

Red Moroccan

Rhassoul

French white Kaolin

Preservatives

Ascorbic Acid

Aspen Pine Bark Extract

Citric Acid

Potassium Sorbate

Salicylic Acid

Sorbic Acid

Sodium Benzoate

Surfactants

Planterin 2000 (liquid)

Sodium cocylisothenate (powder)

Vitamins

Biotin (B7)

CoQ10

DL Panthenol

D-Ribose

Ethyl ascorbic acid

L-Cysteine

Lecithin

Vitamin A

Vitamin B5

Vitamin D3

Vitamin E

Vitamin K3

Minerals

Aluminum oxide

Borax

Calcium Carbonate

Magnesium Sulfate

Magnesium Chloride

MSM

Potassium Chloride

Potassium Iodide

Sodium Chloride

Other

Aloe Vera - use in skin care products.

Arrow Root Powder - is a gluten free starch. Can be used in body powder formulations.

Behentrimonium - conditioning thickener and emulsifier. Used in Hair and skin care formulations.

Butylene Glycol (from corn) - conditioning agent

Camphor Crystals - used in pain relief formulations and lip balms.

Cannabidiol - 99.99% free of THC, not to be confused with Hemp seed oil. Used in cancer and pain relief formulations,.

Centrimonium chloride - very strong hair and skin conditioner.

Cetyl Alcohol - thickening and softening agent. Used in skin care formulations.

Chlorella - used in facial masks

D-limonene - natural solvent made from orange oil. Can be used in cleaning and degreasing formulations.

DMSO 99.9% - has a wide range of uses in the body. We use it to help active ingredients penetrate the skin more deeply. Can be used in formulations that heal, or where active ingredients need to penetrate deep into the body.

Emulsifying Wax NF - holds water and oil formulations together and helps to thicken them. Can be used in any formulations that contains oil/s and water.

Ethanol - natural grain alcohol.

Glycerin - helps hold moisture in the skin. Can be used in skin care formulations.

Glycolic Acid - defoliant acids. Can be used in formulations to remove dead skin cells.

Grape seed extract (proanthocyanidens) - used in facial masks.

Grape skin powder (proanthocyanidens) - used in facial masks.

Henna - used in red and black hair dyes.

Honeyquat PF - used in hair conditioner.

Hydrolyzed Wheat Protein - repairs hair shaft. Can be used in hair care formulations.

Indigo - used in red and black hair dyes.

Ionic Silver - antifungal, antibacterial, anti viral.

Keratin - used in hair care to strengthen the hair strands.

Nano Silver - antifungal, antibacterial, anti viral.

N-Sorb It - is a starch powder that absorbs large quantities of oil, such as bath oils. The starch is processed in a manner that creates unique 'pockets' that can carry the oils essentially in a solid, powder form. Once the starch comes in contact with water, it immediately dissolves releasing loaded oils, fragrances and/or emulsifiers, dispersing them into the water. The starch itself provides a soft feel to the bath water, but does not settle or leave a film. It can be used in bath bombs/fizzies, bath salts/powders, milk baths, body powders and other toiletry formulations.

Natural Silicone - can be used in skin and hair care products to lessen drag when applying skin preparations, and when combing out wet hair.

Matter root powder - used in natural red hair dye.

Menthol Crystals - used as a flavoring for lip balms, salves, toothpaste, lip colors, etc.

N-acetyl Glucosamine - increases collagen production, increase moisture content of the skin, increase elasticity of the skin, increase exfoliation, and increase the speed of wound healing. Used in skin care products.

Oleanolic acid - inhibits 5 alpha reductase which convert testosterone into DHT and is said to cause hair loss.

Olivem 1,000 - INCI name - Sorbitan olivate, Cetearyl olivate. holds water and oil formulations together and helps to thicken them. Can be used in any formulations that contains oil/s and water.

Pink Himalayan Salt - can be used as a thickening agent or in food products.

Potassium Hydroxide - used to make liquid soap.

Propanediol 1,3 (from corn) - solvent.

Pumice Powder - used in formulations to exfoliate skin. Not recommended for use on facial skin.

Rice Starch - used in body powder formulations.

Rosmarinic acid - improves blood circulation in the skin and scalp. Inhibits the loss of hyaluronic acid in the skin. Intensifies weight loss.

Sea Kelp - use in facial masks.

Sodium Alginate - derived from seaweed, it forms a clear gel that can have active ingredients added, or just used as a thickener. Can be used in a wide variety of formulations. Great for peel of masks.

Sodium Deoxycholate - kills fat cells. Used in spot reducing fatty area of the body.

Sodium Hydroxide - used in soap making, and to adjust pH.

Sodium Percarbonate FB - is an oxidizing agent which is used in a number of home and laundry products. Can be used in formulations where cleaning and whitening is desired.

Sodium Pyrovate - kills fat cells. Used in spot reducing fatty area of the body.

Sprulina - use in skin care products

Stearic Acid - is a thickening agent. Can be used in skin and hair care formulations.

Stearyl Alcohol - holds water and oil formulations together and helps to thicken them. When used in skin care formulations, it act as a lubricants on the skin surface, which gives the skin a soft, smooth appearance. When used in hair care formulations, it reduces drag during wet combing. Can be used in any formulations that contains oil/s and water.

Tapioca starch - used in body powder formulations.

Teallac - a natural shellac used in hair spray and mascara.

UV Absorber - used in sun screen and make-up formulations.

Vegekerratine - Used as a hair conditioner.

Walnut Hulls (ground) - used in body scrub formulations. Not recommended for use as a facial scrub.

Xylitol - is a substitute for sugar that will not cause tooth decay. Can be used in toothpaste formulations.

Zinc Oxide - used in sun screen and make-up formulations
